15. Read the given passage carefully and write a précis in about one-third of the original length.

Holidays are special days when people take a break from work or school to relax and enjoy themselves. They can be for religious celebrations, national events, or just to spend time with family and friends. During holidays, people often travel to different places or stay at home to rest. Many holidays are filled with activities like eating special meals, playing games, or watching movies. Some holidays are observed by specific cultures or countries, while others are celebrated worldwide. Holidays are a time to relax, reflect, and create memories. They offer a chance to recharge and return to daily life with more energy. People look forward to holidays

because they bring joy and a break from routine. Overall, holidays are important for happiness and well-being. 7

16. Read the passage and answer the following questions.

Artificial Intelligence (AI) refers to the simulation of human intelligence in machines that are programmed to think, learn, and problem-solve. AI systems can perform tasks that usually require human intelligence, such as recognizing speech, understanding language, making decisions, and visual recognition. AI is used in various fields, including healthcare, transportation, education, and entertainment. For example, AI helps doctors diagnose diseases, self-driving cars navigate roads, and recommendation systems suggest movies or products based on preferences. While AI offers many benefits, such as increased efficiency and convenience, it also raises concerns about job displacement, privacy issues, and the potential for misuse. As AI continues to evolve, it is important to balance its advantages with ethical considerations to ensure that it is used responsibly and for the betterment of society.

1. What is Artificial Intelligence (AI)?
2. In which fields is AI commonly used?
3. How does AI help doctors and healthcare professionals?
4. What are some benefits of AI in everyday life?
5. What are some concerns associated with the use of AI?
6. How can AI affect jobs and employment?
7. Why is it important to consider ethics in the development of AI
