

Name :

K20U 0868

- Reg. No. :

IV Semester B.Sc. Degree (CBCSS-Reg./Supple./Improv.) **Examination, April 2020**

(2014 Admission Onwards) GENERAL COURSE IN COMPUTER SCIENCE 4A14CSC : Operating System

Time: 3 Hours

Max. Marks: 40

13. Elucidate the significance of swapping.

12. Differentiate logical address space A NOITO38 ddress space

1. One word answer :

- (4=0.5=4) (4=0.5=4) (4=0.5=4) a) A software generated interrupt is called Distinguish between waiting time ar
- b) A programme in execution is called a
- is the only large storage area that the processor can access C)__ directly.
- d) Collection of all processes in the system are put into _____ queue.
- e) The ______ scheduler controls the degree of multiprogramming.
- f) A process is ______ if it cannot affect or be affected by the other processes executing in the system. executing with requests an estate of the system. at the system of the syste
- g) The _____ is the module that gives control of the CPU to the process selected by the short-term scheduler.
- h) What is the unfavourable situation of FCFS scheduling called ? 15 e160moO .et 20. With the help of a diagram explain process start B - NOITJAR

Write short notes on any seven of the following questions :

 $(7 \times 2 = 14)$

- 2. What is the solution for starvation ?
- 3. Define throughput.
- 4. A batch system executes _____, whereas a time-shared system has user programs or
- 5. Explain Resource Allocation Graph.

K20U 0868

- 6. State the principle of mutual exclusion.
- 7. What is the basic idea behind deadlock prevention ?
- 8. Differentiate CPU bound and IO bound Process.
- 9. How does swapping affect the degree of multiprogramming ?
- 10. What is booting ?

* •

11. What is UI in an Operating System ? O M 329000 JARSH30

4A14CSC : Operating System

SECTION - C

Answer any four of the following questions :

(4×3=12)

 $(2 \times 5 = 10)$

- 12. Differentiate logical address space vs physical address space.
- 13. Elucidate the significance of swapping.
- 14. Briefly explain SJF scheduling.
- 15. Distinguish between waiting time and response time.
- 16. Which are the necessary conditions for a deadlock ?
- 17. Explain Operating System's responsibility in File Management mechanism.

SECTION - D

Answer any two of the following questions :

- 18. Write an essay on SCAN scheduling with requests on cylinders 98, 183, 37, 122, 14, 124, 65 and 67. (Assuming that the disk arm is moving toward 0 and that the initial head position is 53).
- 19. Compare and differentiate demand paging and segmentation.
- 20. With the help of a diagram explain process states.
- 21. Evaluate various CPU scheduling Algorithms in your own words.

2. What is the solution for starvation ?

- 3. Define throughput.
- A batch system executes _____, whereas a time-shared system has user programs or _____.
 - Explain Resource Allocation Graph.
